

Debbie Scheibel

I have been a sewer since I was a child. I bought my first sewing machine at the age of 12 with my babysitting money. For years, I made most of my own clothes and took up quilting 20+ years ago.

I worked for the City of Nanaimo for many years, starting out in Finance. I moved to the IT department around the year 2000 and managed the Help Desk for a number of years. Teaching software programs was the favourite part of my job.

I have been using EQ7 for many years to design my own quilts or recreate quilts that I see online or in books. The ability to audition layouts, colours and ideas saves valuable time when planning my quilt projects.

I look forward to demonstrating the functionality and flexibility of EQ7.
